

Appendix 1. Community of Practice Project activities

Table 1. Community of Practice Project Activities. Source: Mulloon Institute.

Name	Description
Field Days	Introduction to Mulloon Institute's approach to fostering drought resilience and restoring degraded land. Covering: landscape processes and the critical role of water cycling in functional landscapes.
Bootcamps	A skills-based course to build participants' capacity to implement a landscape rehydration project and optimise water cycling on their property.
Mentoring Program	Select Bootcamp graduates are offered one-on-one mentoring to support them to design, plan and implement a low-risk project.
Boots on the Ground	A practical, on-ground event for the whole community to participate in a project build.
Professionals' Intensive	Natural resource management professionals and community leaders are supported to advance their technical skills in landscape rehydration and strengthen their community engagement strategies to support improved ecological and farming outcomes in their region.
